VII. Other Business

3 years ago behavior cards were implementd, PBIS instated.

NVW has expectations and consequences, we need to improve reward piece.

Student, Connor Kahn, presented to the group: *Blue cards used for negative enforcement *One side of card negative, we should make other side positive. Passes are oversided and inefficient *Student interviewed Grandview students concerning Grandview's handling of behavior. *Students shouldbe be rewarded for following expecations (his opinion) *Students should be rewarded for doing extra special positive behaviors only *Discussed various ways to reward students for special behavior according to positive behavior signatures *Through the use of added positive behavior cards, interviewees like the pride card with more immediate rewards *Rewards should be formulated collectively between teachers and students for more buy in *Some students no longer care about the current behavior cards due to it's negative enforcement.

Amanda Byrd (director of EC) to speak on diversity and behavior: *Looking to guidance training of Module 2 of PBIS *focus on MTSS and NVW needs to focus for SIT plan *NVW has specific students who need immediate attention due to behaviors thus MTSS must take precedence on PBIS *approximately 15% of our population need immediate behavior support *training is need to create interventions for students with behavior issues *Interventions are individualized and not for whole class *NVW needs a thorough process to get them through helping behavior issues *BIP are in use, but if ineffective, testing for behavior issues will take place. EC laws must be followed *Behavior support must be fully documented to comply with EC laws *Data should show the progression of the student's growth in behavior *without documentation of interventions, students can not be properly placed *due to current needs of NVW, new meeting dates and separate committees must be made and comination of SIT/PBIS will be disbanded

PBIS Committe: Starnes, King, A. Sigmon, Gaffney, Moore, Dischiavi, Duffey

Through PLC training all steps are projected to work together to fulfill MTSS requirements
